

Special Education with K-12 Licensure, BS

Program Description

The mission of the Department of Education is to develop competent, caring, and qualified teachers by ensuring that our students acquire the necessary professional knowledge in content and teaching. In pursuit of that goal, the department provides engaging and rigorous classes in the essential areas of teaching, extensive practicum/field experiences in a variety of settings, advisement/mentoring/supervision from experienced, knowledgeable, and caring professors, all within the context of a student-centered learning environment.

Professional Licensure/Certification (PLC) Requirements

The curriculum for programs at Utah Tech University customarily leading to licensure have been designed to meet the educational licensure/certification requirements in Utah as well as to prepare students to apply for licensure exams in the State of Utah. The licensure boards in each state are responsible for establishing the requirements for licensure/certification for their state. Requirement may vary state to state and may change at any time. Students who intend to use their Utah Tech degree to secure licensure in any state other than Utah will need to review the professional licensure disclosures in that state pertaining to their program and consult with the state professional licensing board. For more information, visit the State Authorization and Professional Licensure (<https://academics.dixie.edu/state-authorization/>) web page and select your program, or speak to the director of your program.

BS Special Education Program Learning Outcomes

At the conclusion of this program, students will be able to:

1. Develop meaningful and challenging learning experiences for individuals with exceptionalities that demonstrate an understanding of how exceptionalities may interact with development.
2. Create safe, inclusive, culturally responsive learning environments to help individuals with exceptionalities become active and effective learners and develop emotional well-being, positive social interactions, and self-determination.
3. Apply knowledge of general and specialized curricula to individualize learning for individuals with exceptionalities.
4. Employ multiple methods of assessment and data sources in making educational decisions.
5. Select, adapt, and use a repertoire of evidence-based instructional strategies to advance learning of individuals with exceptionalities.
6. Integrate foundational knowledge of the field and their professional ethical principles and practice standards to inform special education practice, to engage in lifelong learning, and to advance the profession.
7. Collaborate with families, other educators, related service providers, individuals with exceptionalities, and personnel from community agencies in culturally responsive ways to address the needs of individuals with exceptionalities across a range of learning experiences.
