Electrical Engineering, BS

Program Description
The Bachelor of Science Degree in Electrical Engineering provides students with necessary skills to design, analyze, and build electrical, electronic, and electromechanical systems. Electrical engineering emphasizes electrical system design and control and extends into the areas of analog circuits, digital circuits, embedded systems, signal processing, electromagnetics, semiconductor devices, and electrical power. A student with a degree from this program will be well prepared to pursue either advanced degrees in engineering or computer science, or to pursue a technical career in fields such as electrical power systems, communications, or electronics design.

Professional Licensure/Certification (PLC) Requirements
The curriculum for programs at Utah Tech University leading to professional licensure are designed to prepare students for Utah licensure and certification requirements. Admission into programs for professions requiring licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the University, and licensure and certification requirements can change at any time.

Licensure boards in each state establish requirements for licensure and certification for their respective state. States vary by which professions are required to be licensed and how licensure functions, and such requirements may change at any time. The terms related to licensure and certification, among others, also vary by state as well.

Students and prospective students are strongly encouraged to contact the state licensure entity in the state where they intend to work to review all licensure and certification requirements imposed by the student’s state(s) of choice. The University cannot provide verification of a student’s ability to meet licensure or certification requirements unrelated to its educational programming. Some states require individuals to complete additional requirements that are unrelated to educational prerequisites. For more information, visit the State Authorization and Professional Licensure (https://academics.dixie.edu/state-authorization/) web page and select the program, or speak to the director of the program.

Utah Tech University shall not be held liable if a student is unable to qualify for licensure or certification in any jurisdiction.

This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Admission Requirements
The admissions process works as follows:

1. Student applies and is accepted to Utah Tech
2. Student designates their major as Pre-Engineering (pursuing Associate of Pre-Engineering)
3. Student passes the following courses with a C- or better:
   • MECH 1000
   • MECH 1200/05
   • MATH 1210
   • MATH 1220
   • CHEM 1210/1215
   • PHYS 2210/2215
4. Student meets with the engineering advisor to ensure that required courses are complete and to make an academic plan
5. Student’s major is switched from Pre-Engineering to Electrical Engineering

Program Curriculum
123.5 credits

Utah Tech General Education Requirements
All Utah Tech General Education requirements must be fulfilled. A previously earned degree may fulfill those requirements, but courses must be equivalent to Utah Tech’s minimum General Education standards in American Institutions, English, and Mathematics.
### General Education Core Requirements

<tr>
<td>CS 3510</td>
<td>Algorithms</td>
<td>3</td>
</tr>
</tbody>
</table>

### Graduation Requirements

1. Complete 123.5 college-level credits (1000 and above)
2. Complete at least 40 upper-division credits (3000 and above)
3. Complete at least 30 upper-division credits at Utah Tech for institutional residency
4. Cumulative GPA 2.0 or higher
5. Grade C- or better in all Electrical Engineering Required Courses and Technical Elective Courses.
6. Pass the Fundamentals of Engineering (FE) Exam
