English - Professional and Technical Writing Emphasis, BA/BS

Program Description

The Professional and Technical Writing program at Utah Tech University prepares students for careers in technical, scientific, medical, legal, and business writing environments. Courses introduce students to the procedures and practices that professional writers and editors use regularly, including grant writing, freelance writing, interactive media development, magazine production, technical editing, and document design. To further enhance their understanding of language and verbal communication, students in our program investigate areas such as composition theory, visual rhetoric, and the history of rhetoric.

Program Curriculum

120 credits
