

Emergency Medical Services (EMS), AAS

AAS Emergency Medical Services Paramedic Program Learning Outcomes

At the successful conclusion of this program, students will be able to:

1. Formulate a treatment plan for all patient populations using knowledge of pathophysiology and assessment-based management.
2. Facilitate effective oral and written communication and documentation in various situations with patients, colleagues, and other healthcare professionals.
3. Integrate evidence-based practices and critical decision making to safely perform psychomotor skills for patients across the life span.
4. Administer appropriate pharmacological interventions based on principles of pharmacology to formulate a treatment plan intended to mitigate medical emergencies.
5. Illustrate professional paramedic roles and responsibilities through demonstration of ethical principles and moral responsibilities.
