Nursing Education and Leadership, MSN

Program Description

The Master of Science in Nursing in Education and Leadership (MSN) will prepare nurses to lead change to improve quality outcomes, advance a culture of excellence through lifelong learning, build and lead collaborative interprofessional care teams, navigate and integrate care services across the health care system, design innovative nursing practices, and translate evidence into practice.

Students will be prepared to apply best practices in teaching, learning, and leadership for roles in various organizational and academic settings. The MSN program is for the nurse interested in pursuing a career as either a faculty in a school of nursing, a staff educator in a health care organization, or a leader in a school of nursing or a health care organization.

The MSN will additionally focus on critical thinking, judgment, and specialty expertise; understanding health systems and the context of policy and economics; engaging in interprofessional care and collaboration, and increasing awareness of public health needs in various settings.

Definition of the EPSLO Keywords for the MSN Program

Person-centered Care: In a nursing education or leadership context, Person-centered Care can be defined as an approach that values and respects the unique needs, preferences, and contributions of all individuals involved in the health care educational or leadership environment. The focus extends beyond patient care to include students, faculty, staff, and other stakeholders. By prioritizing these individuals' voices and experiences, a more inclusive and effective educational or leadership setting can be achieved.

Clinical Judgment: In a nursing education or leadership context, Clinical Judgment refers to the advanced decision-making skills demonstrated by nursing education and leadership professionals in synthesizing theoretical knowledge, empirical evidence, and ethical considerations to resolve complex challenges. It involves the application of analytical reasoning, critical thinking, and specialized expertise to make informed judgments that influence educational strategies, leadership initiatives, and organizational outcomes.

Communication: In a nursing education or leadership environment, Communication refers to the strategic and intentional exchange of information, ideas, and feedback among various health care stakeholders, such as faculty, students, administrators, patients, patient families, and community partners. This extends beyond mere verbal or written dialogue to include non-verbal cues, emotional intelligence, and active listening. The objective is to foster a collaborative, transparent, and inclusive setting where information is clearly understood, actions are effectively coordinated, and organizational goals are collaboratively achieved.

Compassionate Care: In a nursing education or leadership environment, Compassionate Care refers to the ethical and intentional practice of empathy, understanding, and respect in interactions with stakeholders such as students, faculty, staff, and community partners. It involves recognizing individual needs, valuing diversity, and fostering an inclusive atmosphere that enables all participants to thrive personally and professionally.

Professionalism: In a nursing education or leadership context, Professionalism refers to consistently demonstrating ethical behavior, competence, and the skills necessary to instill trust and confidence among health care stakeholders. This includes faculty, students, staff, and community partners in an academic setting or team members and stakeholders in a leadership role.

Accreditation

The Utah Board of Nursing (BON) has approved Utah Tech's Nursing Programs as required. Effective November 7, 2022, the Master of Science in Nursing (MSN) program is a candidate for initial accreditation by the Accreditation Commission for Education in Nursing. This candidacy status expires on November 7, 2024.

NOTE: Upon granting of initial accreditation by the ACEN Board of Commissioners, the effective date of initial accreditation is the date on which the nursing program was approved by the ACEN as a candidate program that concluded in the Board of Commissioners granting initial accreditation.

ACEN

3390 Peachtree Road NE, Suite 1400

Atlanta, GA 30326

Admission Requirements

Admission requirements include having an unencumbered registered nurse license in their state of residency, as well as a Bachelor of Science in nursing degree from a regionally accredited school with a cumulative grade point average of 2.8 or higher on a 4.0 scale.

The Graduate Record Exam (GRE) is not required.

A maximum of six graduate level semester transfer credits may be applied. These must be from a regionally accredited institution, completed within the past 5 years, and have an earned grade of "B" or higher.

There is no RN work requirement nor current employment as an RN requirement in order to be eligible for admission to the MSN program.

RN licensure in the student's state of residence/employment is required to successfully complete projects. Compact licenses must be endorsed by your state of residence.

Letter of intent outlining the following:

1. Personal statement as to why you are choosing to enhance your career by completing this MSN program.

2. Tentative graduation plan for completion.

Program Curriculum

Master of Science in Nursing - Education and Leadership Program Learning Outcomes

At the successful conclusion of this program, students will be able to:

1. Person-centered Care: Develop and implement a comprehensive person-centered strategy that sustains nursing education and/or leadership stakeholders.

2. Clinical Judgment: Synthesize and integrate evidence-based research and best practices to make informed decisions in nursing educational or leadership contexts.

3. Communication: Select advanced communication competencies to effectively engage health care stakeholders and achieve organizational goals.

4. Compassionate Care: Integrate compassionate care to foster well-being and inclusivity among diverse health care stakeholders.

5. Professionalism: Exemplify professionalism to foster a culture of excellence among health care stakeholders.

Graduate-level Role Specific Competencies:

At the successful conclusion of this program, students will apply role-specific competencies into practice by:

Person-centered Care: Assessing stakeholders needs, values, and preferences to implement a person-centered strategy in a nursing education or leadership context.

Clinical Judgment: Synthesize evidence-based research and utilize predictive models or data analytics to inform decisions in nursing educational or leadership contexts.

Communication: Create and communicate messages that align with organizational goals and resonate with health care stakeholder groups.

Compassionate Care: Exercise ethical frameworks and principles in compassionate decision-making, ensuring alignment with stakeholder needs and organizational values.

Professionalism: Exhibit leadership attributes that contribute to professional practice and organizational success, including effective decision-making, delegation, and conflict resolution.
