Psychology, BS

BS Psychology Program Learning Outcomes

At the successful conclusion of this program, students will be able to:

- 1. Differentiate and compare major concepts, theoretical perspectives, historical trends, and empirical findings within psychology, and discuss behavioral problems.
- Use scientific reasoning to examine psychological phenomena; demonstrate psychology information literacy; engage in innovative and integrative thinking and problem solving; understanding and appropriately utilizing basic scientific methodology; and incorporate sociocultural factors in scientific inquiry.
- 3. Apply ethical standards to critique and evaluate psychological science and practice in the context of various communities.
- 4. Demonstrate competence in writing and in oral and interpersonal communication skills, including their ability to utilize research to compose original arguments/hypotheses, as well as to revise their writing.
- 5. Apply psychological principles to real world practical experience and show evidence of career preparation.
